

## NSC nonwoven (Asselin-Thibeu) at ITMA Asia + CITME 2008

NSC nonwoven (Asselin-Thibeu) is well known for such nonwoven equipments as the Excelle® cards, crosslappers, Prodyn® weight distribution regulator, drafters, needlelooms, winders and slitters-rewinders.

To meet all nonwoven producers' targets, the above NSC nonwoven machines are available in several level of performances which can be found among the two ranges of equipment:

- The state of art range of equipment
- The Axxess range of equipment

At ITMA Asia, NSC nonwoven will exhibit for the first time it's A.30 needleloom. This needleloom is part of the Axxess range of equipment, as the CA21 cards, the Profile P.325 and Active crosslappers.

The Axxess machines distinguish themselves by their medium production capacity performances, price competitiveness together with similar quality in design as the NSC nonwoven state of art range of machines.

At ITMA ASIA, NSC nonwoven will also introduce its innovations in cutting and winding machinery. Vantage mother reel winders, VantageSlitters and EasyWinders will highlight its extra benefits such as consistent roll quality, high production cycle efficiency, flexibility, ease of maintenance and minimum downtime, user friendliness etc.

Come and see us at ITMA ASIA + CITME Shanghai, Hall W4, Booth C09
