

- Fleissner - spunlace systems, drying, finishing, thermo bonding, etc.
- Gavazzi - stamping press, hydro extractor, cake opener, dryer, and bailing press
- Fong's - bleaching range
- Andritz Kuesters - calenders
- Bastian - Winders

- Falu and Bouda - conversion and packing machines
- Canalair - humidification systems.

In order to meet and cater to increasing demands in this sector, A.T.E. is in a position to offer machinery for setting up of complete nonwoven and technical textile plants.

NSC nonwoven offers its customers a new opportunity: the Axxess line in addition to the highly successful Excelle® range of equipment

What is it?

An alternative for markets targeting lower production capacity, cost adapted machinery and attractive prices with similar design quality to the Excelle® line.

What are the customers' benefits?

Durable and reliable, constant productivity over the years and low maintenance costs: the Axxess line includes cards, crosslappers, drafters, needlelooms, winders and slitter-rewinders.

NSC nonwoven provides complete turnkey Axxess solutions for process applications such as: geotextiles, automotive and filtration.

During the ITMA Asia show, NSC nonwoven

exhibited for the first time the Axxess A.30 Needleloom with great success: two A.30 needlelooms are already sold and several others are under final discussion.

Thanks to the combination of Axxess and Excelle® equipment, NSC Nonwoven answers major customers' expectations such as production lines adapted to local market size, cost reduction with faster production lines, lower average fabric weight, lower maintenance requirements and also customized products with in line combination of technologies.
