

When it comes to innovative polymer technology, we've gone soft.

Rieter Automotive Chooses NSC

Posted on January 20, 2010 @ 10:25 am

Rieter Automotive North America, Farmington Hills, MI, has contracted NSC Nonwoven to provide equipment for a needlepunching line providing velour carpet to the automotive industry.

The line will include Thibau Excellé batt formation with IsoProDyn completed with Asselin needlepunching and the newest SDV Velour needleloom for finishing. This new line will offer high output while maintaining minimum weight variation and improved fiber orientation for consistent strength properties. Manufacturing equipment will be installed in Rieter's Bloomsburg, PA location.

Included with the purchase is Laroche opening and blending and Signal Machine's auxiliary equipment.

All after sales service and support will be supplied via NSC USA located in Fort Mill, SC.
