Dear customer,

ASK FOR THE ORIGINAL ONE!

THE CARBON APRON:
A KEY PART FOR THE CROSSLAPPER.

Why should you buy carbon aprons from Asselin-Thibeau company?

- We are the machine manufacturer.
- Our carbon aprons are checked under strict control.
- We offer carbon aprons at market prices.
- We develop our own carbon aprons adapted to the machine and also to our customer's textile requirements.
- Our textile engineers benefit from a worldwide experience.
- In case of a textile problem, if carbon aprons are from another supplier, it is difficult for us to help you.

A bad quality carbon apron will bring about:

- Textile problems.
- Production breakage for maintenance.
- Poor quality.
- Guidance problems.
- Rapid destruction of bearings.
- Short operating life.
- Reduction in production speeds.

Do not hesitate in asking us more information.
