Dear customer,

D.U.R. doffing comb focus

THE ESSENTIAL KIT!

The DUR doffing comb is a security part on your card. This unit lifts up automatically in case of a textile overload. So, it is essential to maintain this device in perfect running order.

To do so, we advise you to always keep in stock the following parts:

- One bearings kit for the D.U.R. motor with its stop rings
- One bearing with its stop ring for the bearing hub
- One KM tapering nut for an effective clamping of the torsion bar
- One Lithoplex grease tube

You have also to check very regularly the running condition of the amplitude detector: the electrical detection must always be kept over 3,5V.
